<u>FASTTEST-2917</u>	Cannot allow '&' in <Recommendation> in FDIS Certificates
<u>FASTTEST-2345</u>	Set A3 to default download option on cloud
<u>FastTest- 3226</u>	Signatures not removing on the export file

New feature details

FastTest 2907

When a user runs FastTest, the software will check to see if the local SQL Services (Instance\AMTECHFASTTEST and SQLBrowser) are running.

If they are not running then there is an attempt to start the services.

This only applies to local SQL Server instances. For example in a standalone installation or the local instance in a client installation.

If the services are not running a dialog will appear that will ask the end user to allow FastTest to attempt to start the service.

Once the action has been completed user now logged into FastTest.

Workflow:

- Click on FastTest icon
- FastTest checks if the services are running
- If running logs in as normal
- Not running a dialog will appear
- User allows FasTest to attempt to start services via the dialog on screen
- Services started and logged into FastTest
 - If services cannot be started error displayed on screen
 - End user to call client services department

FastTest 2345

Cloud has now set the default to A3 for the download option rather than A1.

This means that when a user is on the cloud this will always be the A3 selected.

What version of the desktop software are you importing into?

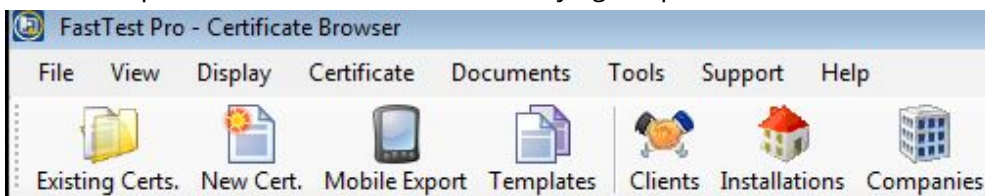

A1

A3

FastTest 1919

Mobile export button on the ribbon in FastTest has now been removed.

This will stop the scenario where users were trying to upload to cloud from here.
